

ABHISHEK DAGAR

Data Engineer | Data Pipelines & Automation | Cloud-Native ETL | Enterprise Platforms
Gurugram, Haryana, India | +91 9354382500 | abhidagar024@gmail.com | [linkedin](#) | [github](#)

Professional Summary

Data Engineer at Nagarro building end-to-end Kedro ETL pipelines that move enterprise data through Amazon S3 and Redshift, and automating Data Quality validation for a Johnson & Johnson dataset using reusable, rule-based modules. Cut manual reporting effort by 90% through Python/Snowflake automation. Databricks (Associate & Professional) and Microsoft Fabric certified.

Professional Experience

Associate Data Engineer

Jan 2025 - Present

Nagarro

Gurugram, Haryana

- Developed end-to-end ETL pipelines using Python, SQL, Kedro, Amazon S3, and Redshift for automated processing of enterprise data.
- Designed and implemented a robust Data Quality Framework, processing highly unstructured datasets using approximately 30 reusable validation modules.
- Engineered end-to-end Kedro ETL pipelines for enterprise data ingestion, applying data modelling principles and efficient transformation logic for downstream analytics.
- Developed backend automation solutions using Python, SQL, and Snowflake to streamline reporting workflows, reducing manual operational effort by 90%.
- Engineered high-throughput backend data processing layers using normalized schemas and reusable validation frameworks, improving reporting accuracy by 40% and maintainability.
- Integrated Airflow and Azkaban workflows with ServiceNow for automated incident generation, cutting incident response time by approximately 70% during pipeline failures.

Projects

Enterprise Data Quality Framework (Johnson n Johnson)

Nagarro

mar 2026 - june 2026

- Automated schema, null, duplicate, datatype, and cross-dataset validation with configurable rules, reducing manual validation effort by approximately 7 hours per week.
- Built modular pipeline orchestration with centralized logging and exception handling, reducing debugging time and improving overall pipeline reliability.

End-to-End Kubernetes-Based Deployment and Monitoring

Nagarro

Feb 2025 - May 2025

- Architected production-grade Kubernetes workloads (Deployments, Services, PV/PVC, ConfigMaps, Secrets) with centralized Prometheus/Grafana monitoring, using Helm for reproducible provisioning across environments.

Technical Skills

Backend Development: Python, SQL, Node.js, Flask, REST APIs, MVC Architecture

Data Engineering: Databricks, Apache Spark, ETL Pipelines, Data Modelling, Data Warehousing

Databases & Data System: MySQL, Snowflake, Amazon Redshift, ETL Pipelines, Apache Spark

DevOps & Cloud: AWS, Docker, Kubernetes, Terraform, CI/CD (GitHub Actions, Jenkins), Ansible

Tools and Platforms: Apache Airflow, Azkaban, Prometheus, Grafana, Azure DevOps, GitHub

Certifications & Achievements

Microsoft Certified: Fabric Data Engineer Associate

Databricks Certified: Data Engineer Associate and Professional

Education

USICT, Guru Gobind Singh Indraprastha University

Nov 2021 – May 2025

Bachelor of Technology, CSE CGPA:8.66

Delhi, India

Leadership and Responsibility

- * Active core member of the **IEEE club**, organizing and **leading** the club's annual **technical fest** to promote innovation and technical collaboration among students.
- * Elected **President, Student Council**, GGSIPU (2024-2025), organizing multiple **sports and cultural fests** and leading a team of **400+ student volunteers**.
